

SHEHARVEST

“She Grows, You Glow.”

SHEHARVEST

By: Byte to Bite

PROBLEM STATEMENT

- People today are demanding more organic, chemical-free products.
- No platforms exists that directly connects such home-growers to consumers.
- Middlemen eat into their profits.
- Housewives and small home-growers lack access to a reliable market.
- Urban spaces (terraces ,balconies) are underutilized for farming.

THE SOLUTION

- A website/app that directly connects housewives growing organic produce to local customers.
- Offer an easy registration system for small-scale growers(especially women) to list their produce.
- Ensure transparency in product source, freshness, and quality.
- Facilitate doorstep delivery of homegrown, organic products.
- Promote urban farming, women empowerment, and local, sustainable living.

ACTION PLAN

PLATFORM DEVELOPMENT

- Design and develop website + mobile app.
- Features: Seller registration, product listing, order management ,delivery tracking.
- Create a dashboard for both sellers and buyers.

ONBOARDING AND PILOT LAUNCH

- Onboard initial groups of sellers(home-growers).
- Provide training for listing and quality standards.
- Launch pilot in one locality or city.
- Handle logistics: delivery partners or self pickup systems.

SCALING AND INNOVATION

- Launch mobile app for broader access.
- Add new product categories (homemade pickles, seeds, compost kits).
- Offers seller rewards and customers loyalty programs.

TARGET AUDIENCE

Urban consumers

- health conscious family seeking fresh, organic and chemical-free food
- parents who prioritize safe food for their children.
- Young professionals looking for convenient doorstep delivery.

Home based growers

- Housewives engaged in terrace or backyard farming.
- Senior citizen with gardening experience and passion .
- Hobby farmers and green enthusiast looking to monetize their efforts.
- Urban households with spare spaces to grow and sell fresh produce.

HOW IT WORKS

**Sellers(home-growers)
register on the platform.**

**List their fresh produce with
pictures and price.**

Customers place orders.

**Either sellers deliver locally or
a delivery team picks up and
drops off.**

REVENUE MODEL

Commission Per Scale

- Earn a small percentage (e.g., 5%-15%) from each transaction made on platform.
- Flexible commission based on product type or seller tier.

Delivery Charges

- Add a nominal delivery fee for customers based on location and order size.
- Option for free delivery above a minimum order value.

Ad-space & Promotions

- Allow eco-friendly brands or organic product sellers to advertise on the platform.
- Promote local tools, seeds, gardening accessories, etc.

Future Revenue Avenues

- Workshops & paid content : terrace farming tips, organic certifications.
- B2B sales to cafes , wellness stores, and schools.

KEY BENEFITS

HEALTH

EMPLOYEMENT

ECONOMICS

MARKET ANALYSIS

1. GROWING DEMAND FOR ORGANIC PRODUCTS

- The organic food market in India is projected to grow at 20–25% CAGR.
- Urban consumers are increasingly health-conscious and aware of food sources
- Rise in lifestyle diseases has shifted focus toward clean eating

2. URBAN FARMING IS ON THE RISE

- More people are adopting terrace and home gardening post-COVID
- Social media communities promoting DIY organic farming
- Availability of kits, seeds, and online support boosting the trend.

3. SHIFT TOWARD LOCAL & SUSTAINABLE

- Consumers prefer local over mass-produced due to trust, freshness, and sustainability
- Trend of “farm-to-table” and “grow-your-own” is rapidly increasing in cities

DEMAND FOR ORGANIC FOOD

COMPETITOR ANALYSIS

Features/Aspect	Blinkit/ Zepto	BigBasket/ FreshtoHome	SheHarvest
Product source	Warehouses,suppliers	Farms & vendors	Home-grown, terrace-farmed produce
Organic focus	Partial(limited range)	Available, but not exclusive	100% focus on organic & chemical-free
Seller type	Businesses& farmers	Contract Farmers	Housewives, home-growers,urban farmers
Empowers women	No	No	Yes - women as primary producers
Community-centric	No	No	Yes - local networks & urban homes
Product freshness	Stored, in transit	Shipped from farms	Same-day harvested & delivered

FUTURE PREDICTION

Geographic expansion

- Launch in major metro cities first, then scale to Tier 2 & Tier 3 cities
- Build regional seller networks for localized delivery..

Product Diversifications

- Add homemade products: pickles, papads, herbal teas, etc.
- Include eco-friendly items like compost kits, seed bombs, and grow bags
- Introduce seasonal subscription boxes (e.g., “Winter Wellness Basket”)

Community Building

- Start local “Green Circles” – urban gardening clubs & workshops
- Collaborate with schools and NGOs for awareness and training
- Encourage rooftop-to-rooftop inspiration stories

Our Unique Selling Point

Women-led farming
network

100% Organic
& Homegrown produce

Hyperlocal, Sustainable
Model

Direct from Grower to
consumer

Community-Driven and
Trusted -Based

FreshHarvest

Fresh, Local, Organic

ORGANIC PRODUCE
E-COMMERCE

Our idea aligns with the following SDGs:

2-ZERO HUNGER

Our platform promote food security by enabling the local production and distribution of fresh organic produce.

5-GENDER EQUALITY

We empower housewives by providing them with an income generating opportunity through home and terrace farming.

13-CLIMATE ACTION

Organic terrace farming significantly lowers greenhouse gas emissions compared to industrial agriculture.
